

**MEANGREEN**  
ELECTRIC MOWERS

2024

COMMERCIAL GRADE. ALL DAY POWER.

# POWER YOU CAN RELY ON. ALL DAY LONG.

Mean Green invented the world's first commercial grade, electric, zero-turn mower that could mow all day. Today, Mean Green offers a full range of electrified commercial mowers that can mow all day on a single

charge. Unlike competitive "all day" mowers that claim all day "run times", Mean Green mowers have proprietary designs that allow you to continuously MOW for up to 8 hours on a single charge.

# THE MEAN GREEN DIFFERENCE

- We invented All-Day-Power and are 100% focused on electric mowing.
- Only Mean Green has over a decade of real-world PROVEN results!
- We offer the broadest range of electrified commercial mowers and technology.
- Our patented battery location and low center of gravity provides industry leading slope ratings and precise handling.
- Our heavy-duty Impulse Drive System™ (IDS) provides industry leading life expectancy and reliability.
- Two deck options, choose our innovative mulching rear-discharge, or traditional side-discharge Vortex deck.
- Due to our exclusive lightweight aluminum chassis, patented blade monitoring system and Vortex™ cutting system, when we say All-Day-Mowing, we MEAN it!

**OUR MISSION** is a simple one and it is reflected in our tagline: Commercial Grade. All Day Power. We build lawn mowers for the commercial user who requires equipment that runs all day, every day, with little to no maintenance. While we are pleased with the eco-friendly nature of Mean Green Mowers (no gas, no fumes, and much quieter operation), we understand that that is secondary to mowing professionals who need to justify their investments. The business case for switching to a Mean Green mower has never been stronger.

SCAN CODE and our **ONLINE CALCULATOR** will calculate your personal savings

## The **BUSINESS CASE** for switching to Battery Electric Power

Not so long ago, you needed to be an environmentalist to make the case for battery-powered outdoor power equipment. Today you just need to use your business smarts and ask the right questions.

While it's natural to experience "sticker shock" if you are new to lithium ion power, once you have factored in the operational savings of switching from gas you may have a completely different view.

### Estimate your Operational Savings

	EVO	RIVAL	VANQUISH	FURY	NEMESIS
<b>Operational Savings*</b>	\$12-15/hour	\$8-10/hour	\$8-10/hour	\$4-5/hour	\$4-5/hour
<b>Annual Savings</b>	\$12,480 - \$15,600	\$8,320 - \$10,400	\$8,320 - \$10,400	\$4,160 - \$5,200	\$4,160 - \$5,200
<b>5-Year Savings</b>	\$62K - 78K	\$41K - 52K	\$41K - 52K	\$20K -26K	\$20K -26K

\* Operational savings will vary depending on specific gas and electric mowers being compared and market conditions. Savings include 1) cost of gasoline vs. electricity consumption, and 2) comparative routine maintenance. Visit [meangreenproducts.com/simple-savings-calculator](http://meangreenproducts.com/simple-savings-calculator) for more information.

# ★ USA ENGINEERED AND BUILT

Assembled in the USA using domestic and foreign parts.

Mean Green Mowers are proudly manufactured in the USA. We cut no corners and use only the finest, most durable materials. Our patented mower designs and lithium battery technology are crafted with the commercial user in mind. "Commercial Power, All Day Long."

### Commercial Grade

Built for the RIGORS of the landscaping industry.

### All Day Power

Mow for up to 8 HOURS without recharging.

### User Friendly

HALF the noise, NO fumes, and touchscreen operation.

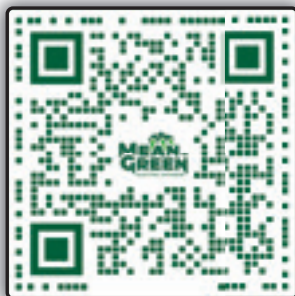

### Planet Friendly

NO gas emissions, NO gas spills, low carbon footprint.

# SMART FEATURES THAT MATTER

## ALUMINUM CHASSIS AND DECKS

Like many heavy-duty work trucks offered today, Mean Green utilizes aluminum instead of steel to reduce the weight of the mower to increase power consumption efficiency. Less weight MEANS industry leading runtimes, what you'd expect from the company that invented electric commercial mowing!

—EVO, RIVAL, VANQUISH, & FURY

## SMARTDECK™ RAPID LIFT SYSTEM

Our SmartDeck™ rapid height deck lift system (patent pending) can be operated with the push of a button or foot pedal. When approaching curbs or obstacles, a simple touch of the electronic foot pedal will completely elevate the deck within 2.8 seconds!

—EVO, RIVAL & VANQUISH

## BLADE PERFORMANCE MONITOR

Displays speed and performance of each blade to help the operator maintain optimal mowing efficiency and quality of cut. Monitoring lights shown above the SmartDeck™ rapid height deck lift foot pedal (see SmartDeck™ below).

—EVO, RIVAL, VANQUISH, & FURY

## STABILITY ON 20° SLOPES

Evolution Series ZTRs are stable on slopes up to 20 degrees due to our patented, ultra-low, centralized center of gravity, and engineered battery configuration located only 8 inches above the ground.

—EVO, RIVAL & VANQUISH

## IMPULSE DRIVE SYSTEM (IDS)<sup>™</sup>

Our patented fan-cooled Impulse Drive System (IDS<sup>™</sup>) utilizes American made planetary gear drives from Auburn Gear<sup>®</sup>. Commonly found in construction equipment, these drives are designed to perform all day, every day, all seasons, in some of the worst conditions. Made with heavy-duty cast iron housings and steel cut gears that provide a max load rating of 9,000 lbs/4.5 tons per mower, these drives are designed to last. Controlled by proprietary software, the drives offer precision handling season after season.

—ALL MODELS, except NEMESIS

## VORTEX CUTTING DECK

Our pioneering Vortex decks are offered with either side discharge or innovative mulching rear discharge. Only Mean Green offers a Mulching Rear Discharge Deck in the industry, taking productivity and innovation to new levels.

—ALL MODELS

## INTERACTIVE TOUCH SCREEN DISPLAY

The Interactive Touch Screen Display, with pass code and administrator mode, is function-tested in all environments to ensure long term reliability. Displays full functionality including battery consumption, state of charge, deck lift system, blade speed control, and drive speed settings. EASY push button START. NO keys needed!

—ALL MODELS

## BATTERY LOCATION PATENT

Our patented battery location allows us to locate our battery between the drive wheels, whereas competitors would have to locate it above the centerline of the axle, positioning it much higher which significantly limits their performance.

—ALL MODELS

# EVO

Commercial Electric Powered

## THE WORLD'S MOST PRODUCTIVE ELECTRIC ZERO TURN

The EVO is the industry's largest electric zero turn. With up to 8 hours of continuous mowing time thanks to its 35-kWh battery, a 74" mulching rear discharge deck, 20-degree slope capability, and performance comparable to a large diesel mower, the EVO is ready for a 50-acre day.

### Mean Green Exclusive

- ★ All Day Runtime, up to 8 hours of continuous mowing
- ★ 74" 5-blade innovative Vortex mulching rear discharge deck • Battery Options: 14.5 kWh, 22 kWh, 35 kWh
- ★ Industry exclusive lightweight aluminum chassis and deck for ultra efficient power usage
- ★ Patented blade monitoring system for optimal cut quality and efficiency
- ★ Patented low battery location for industry leading hillside stability and precision handling
- ★ Patented Heavy-duty Impulse Drive System™ (IDS) provides industry leading performance and reliability

5 YEAR

LIMITED MOWER WARRANTY

5 YEAR

LIMITED BATTERY WARRANTY

### STANDARD EQUIPMENT

- Aluminum Chassis and Deck
- 13 MPH Top Speed
- SmartDeck™ Patented Electronic Cut Height Adjustment
- Blade Speed Monitoring System
- Interactive 4" Touch Screen Display
- High Back Suspension Seat
- MICHELIN® TWEEL® Front Caster Wheels

### ACCESSORIES/OPTIONS

- 14.5-kWh, 22-kWh or 35-kWh Battery Options
- 74" 5-Blade Mulching Rear Discharge Deck
- Front Mount Blast Blower
- MICHELIN® TWEEL® Drive Wheels
- Solar Canopy
- LED Light Kit
- LED Amber Flashing Beacon
- USB Charge Port
- Jack Kit

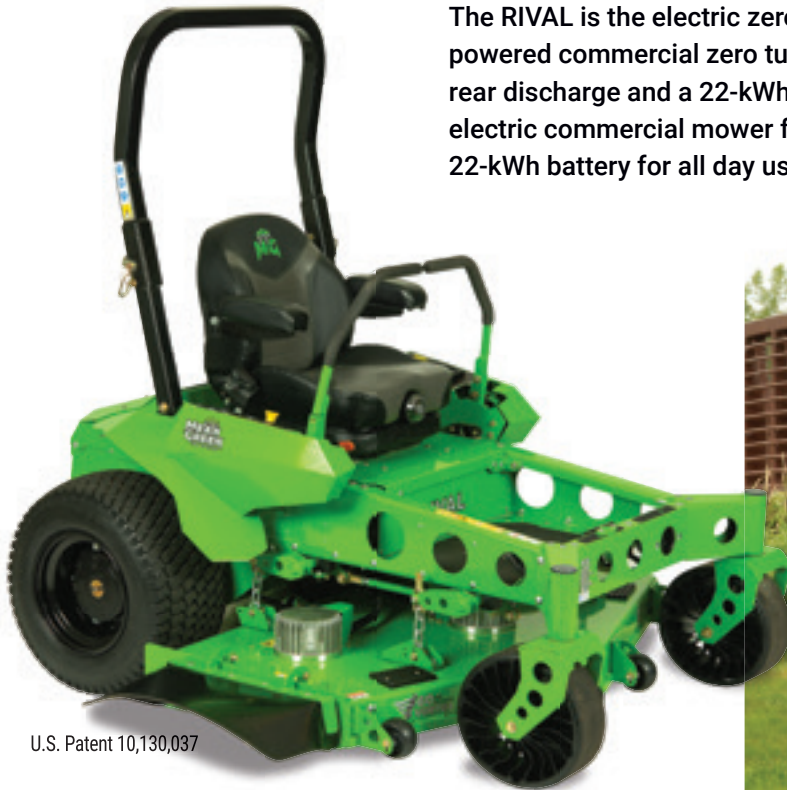

# RIVAL

Commercial Electric Powered

## THE GO-TO ELECTRIC COMMERCIAL ZERO TURN

The RIVAL is the electric zero turn that rivals the performance of a large gas powered commercial zero turn. Offered in 60" or 52" deck sizes, side or mulching rear discharge and a 22-kWh battery for all-day mowing, makes it the perfect go-to electric commercial mower for landscape maintenance. Choose between the large 22-kWh battery for all day use or our 14.5-kWh battery for over a half days work.

U.S. Patent 10,130,037

### Mean Green Exclusive

- ★ All Day Runtime, up to 7 hours of continuous mowing
- ★ 60" or 52" Vortex decks, side discharge or innovative mulching rear discharge
- ★ Industry exclusive lightweight aluminum chassis and deck for ultra efficient power usage
- ★ Patented blade monitoring system for optimal cut quality and efficiency

- ★ Patented low battery location for industry leading hillside stability and precision handling
- ★ Patented Heavy-duty Impulse Drive System™ (IDS) provides industry leading performance and reliability

# VANQUISH

Commercial Electric Powered

## STANDING TALL ABOVE THE FIELD

The VANQUISH is the electric stand-on that will vanquish anyone's need for a gas-powered stand-on. Offered in 60" or 52" rear or side discharge deck sizes and power comparable to a large gas stand on, it is the perfect go-to electric commercial mower for everyday use. Choose between the large 22-kWh battery for all day use or our 14.5-kWh battery for over a half days work.

### Mean Green Exclusive

- ★ All Day Runtime, up to 7 hours of continuous mowing

# FURY

Commercial Electric Powered

## BIG PERFORMANCE IN A COMPACT PACKAGE

The FURY utilizes our patented electronic technologies found in RIVAL and VANQUISH models reconfigured into a compact platform. Available with a 32" or 36" mulching rear discharge or 36" side discharge deck, 11-kWh fixed battery, the FURY is perfect as a trim mower or as an all-day workhorse. With up to 7 hours of work time and oversized Impulse Drive System, the FURY will compete with any gas mower in its class and then some.

### Mean Green Exclusive

- ★ All Day Runtime, up to 7 hours of continuous mowing
- ★ 36" and 32" Vortex decks, 36" side discharge or innovative 36" and 32" mulching rear discharge
- ★ Industry exclusive lightweight aluminum chassis and deck for ultra efficient power usage
- ★ Patented blade monitoring system for optimal cut quality and efficiency
- ★ Patented low battery location for industry leading hillside stability and precision handling
- ★ Patented Heavy-duty Impulse Drive System™ (IDS) provides industry leading performance and reliability

- Semi-Pneumatic Caster Wheels
- USB Charge Port
- Phone Holder
- Cup Holder
- Built-in Tie Down Points

### ACCESSORIES/OPTIONS

- 36" Side or Mulching Rear Discharge Deck, 32" Mulching Rear Discharge Deck
- LED Light Kit
- LED Amber Flashing Beacon
- Jack Kit
- Aluminum Grass Catcher

# NEMESIS

Commercial Electric Powered

## FOR THOSE WHO DON'T REQUIRE ALL-DAY POWER

The NEMESIS brings commercial mowing to those who don't require all-day run time. With a battery life of up to 2.25 hours (enough to mow up to 5 acres), speed of up to 8 mph, 15-degree slope capability, and power equivalent to a 28 HP gas mower, the NEMESIS checks every box of commercial performance.

### Mean Green Exclusive

- ★ Cut up to 5 acres on a single charge
- ★ 60" or 48" Side Discharge Vortex Decks
- ★ Industry exclusive lightweight aluminum body for ultra efficient power usage
- ★ Patented low battery location for industry leading hillside stability and precision handling
- ★ Hydro-Gear® Smartec powertrain and 22" drive tires for smooth 8 mph top speed

- MICHELIN® TWEEL® Drive Wheels
- Trailer Hitch

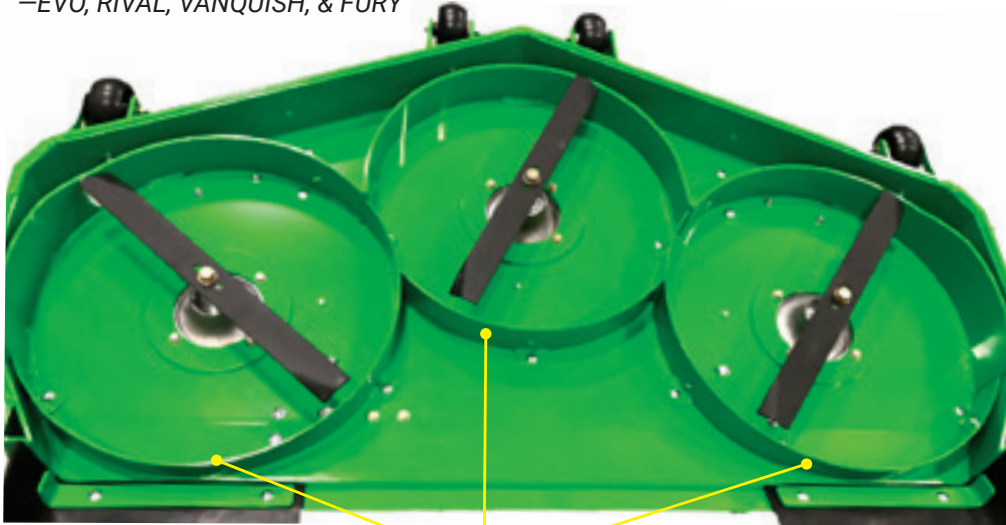

# ACCESSORIES

## OPTIONAL REAR DISCHARGE DECK

The Rear Discharge deck (standard on EVO) includes baffles that result in 80% of grass clippings being mulched and 20% discharged out the rear of the deck. The baffles can easily be removed if no mulching is desired. But rather than discharging unevenly (as mowers with single direction blades do), grass dispersal is evened out with the help of the opposite spinning blade on the right side of the deck.

—EVO, RIVAL, VANQUISH, & FURY

Removable baffles

## REAR MICHELIN X TWEELS (Turf Airless Radial Tire)

These flexible, high-strength, poly-resin wheels enhance operator comfort and reduce contact pressure with the ground. Front Tweels are standard on EVO, RIVAL & VANQUISH, but Optional Rear Tweels are available on EVO, RIVAL, VANQUISH, and NEMESIS.

U.S. Patent 10,327,392 B2

## ORV-BLAST

Our patented Off-Road-Vehicle (ORV) commercial electric debris blower lets you easily blow leaves, grass clippings, sticks and other debris from the operator position.

- Powerful 2 speed 120/155 MPH velocity
- Up to 510 CFM air flow
- Low Noise (60 dba)
- Zero Emissions

—EVO, RIVAL & VANQUISH

### SOLAR ELECTRIC CANOPY

Add solar charging ability (and a sun canopy for the operator) with Mean Green's 200W Solar Panel. Adds up to twenty extra minutes of mowing time per day.

—EVO & RIVAL

### ZTR JACK

Provides 14" of lift for maintenance work. Mounts to front and can travel with mower.

—EVO, RIVAL, VANQUISH, & FURY

### LED FLOODLIGHT KIT (2)

Light the way with a pair of the brightest and most versatile lights available. One light mounts on each side of drive levers.

—EVO, RIVAL & VANQUISH

### USB PORT & CELL PHONE HOLDER

Keep your phone charging and at your side on riding models.

—ALL MODELS

### ALUMINUM GRASS CATCHER

The Accelerator Aluminum Grass Catcher replaces the chute on your Mean Green Side Discharge Mower and is quick and easy to load and unload your discharged clippings. Holds over 30 gallons.

—RIVAL & VANQUISH

### ROAD WARNING LIGHT KIT

Provides the extra attention needed to work on or alongside busy roads or in heavy pedestrian areas. Includes hazard lights, headlights, taillights, turn signals, flashing beacon light, and a horn. Beacon also sold separately.

—EVO, RIVAL, VANQUISH, & FURY

# CHARGING SOLUTIONS

## SIMPLE, FAST CHARGING

Just plug your Mean Green mower in at the end of the day and you'll be ready to go in the morning.

Charging ports in the front and the back allow you to double up and use two chargers simultaneously. With two chargers you can cut the charging times shown by 50% or more.

## Times needed to charge a fully depleted battery

CHARGER >	48V 23A (110V) requires 10A AC from outlet	48V 35A (220V) requires 7.6A AC from outlet	48V 50A (220V) requires 10.9A AC from outlet
7.2 kWh BATTERY	6.5 hrs	4.5 hrs	N/A
11 kWh BATTERY	10 hrs	6.5 hrs	5 hrs
14.5 kWh BATTERY	13 hrs	8.5 hrs	6 hrs
22 kWh BATTERY	19.5 hrs	13 hrs	9 hrs
35 kWh BATTERY	30.5 hrs	20 hrs	14 hrs

# CUSTOMER FEEDBACK

“From day one, when the team from Mean Green Mowers stopped by our store to show us their product, we have been amazed by their product and company. Currently, we have four mowers on display in the store and they have caught a lot of attention when customers walk in. Everyone states how the machines look well-made and are impressed with how quiet they are as well as the speed of the mower. We are excited to get into the spring season and let our demo machine out and get some customers in the seat and start creating a better environment.”

**Mike Collins**  
Ready Equipment, LLC

*“The quality of the mower and the technology incorporated in the design is impressive.”*

“We are currently in our 5th year of retaining the contract at the local university and have been utilizing the same MG mowers. The mowers have made a substantial reduction in noise level; the university likes the fact that we are not disrupting the classes. The quieter mowers are better options for our employees as well.”

**Ron Fiocchi, Vice President, Operations.**  
Mariani Enterprises LLC

“We are proud to partner with Mean Green in the state of Indiana as a leader in the commercial mowing industry with Lithium Ion battery technology. Mean Green is a proven leader with a strong path forward to develop new, exciting, & green products for the commercial landscape industry.”

**Brian McGavic**  
McGavic Outdoor Power

“These mowers really do cut for 7 plus hours. I was a bit skeptical of the claim, but after using them for a couple of days my guys got through their work and had plenty of battery left! Great job Mean Green!”

**Frank**  
Eco Lawn, Tampa FL

“Having Mean Green as another brand in my dealership, has opened up more opportunities for my business. I have been able to sell into areas that I would not normally be in with my current gas mower brands.”

**Joe Blair Garden Center, Miami FL**

“After researching the market, the Bacher Corporation of CT decided to take on the Mean Green Electric mower line. The quality of the mower and the technology incorporated in the design is impressive. The Mean Green sales team has been very supportive during the new dealer process; training us in sales, service and answering all questions.

The Mean Green Electric Commercial mower is a good fit with the Bacher Corp’s grounds maintenance equipment line-up and we look forward to a long, profitable relationship with the Mean Green Mower Family.”

**Jean Desousa**  
The Bacher Corp.
