

[Sweepers from AS-Motor]

The new universal sweepers from AS-Motor - over paving stones and slabs

Alongside areas of greenery, solid surfaces are also gaining in importance in gardens and landscaping. This is where the new AS-Motor sweepers come in. Five sweepers from the product families EcoBrush and ProBrush enrich and extend the path forged by the WeedHex AS 50. Ease of use, efficiency, ergonomic design, environmental sustainability and a high level of winter durability distinguish the AS-Motor EcoBrush and ProBrush. On paving stones or slabs, concrete, asphalt - the sweeping results are captivating wherever.

Multi functional: sweep in the summer - remove snow in the winter

The extremely weather-resistant and long life universal brushes do away with dust, leaves and snow with ease. It is particular in winter maintenance that the AS-Motor sweepers show their strengths. With the use of accessories such as snow chains and a blade, the sweepers are transformed into a multi functional platform which is indispensable in terms of use, diversity and efficiency.

[NEW]

- ▶ **EcoBrush AS 730, AS 830, AS 835**
The economic sweepers for the serious private user.
- ▶ **ProBrush AS 835, AS 1040**
A caretaker's dream: The professional solution for all those who want to sweep large areas.

The AS-Motor sweepers - EcoBrush and ProBrush

PRO EcoBrush - All year round value

EcoBrush - Entry level models offering exceptional value for money, ideal for the private user looking for constant year round versatile performance. This versatility can be further expanded upon with the use of the extensive range of accessories such as collection boxes, leaf collectors and much more including a snow blade for simple, efficient and cost effective winter use.

Height adjustable, folding handles allow for optimum comfort and compact storage. The front caster wheel allows light easy direction control, plus adjusts to alter brush pressure so that an optimum performance can be achieved according to the conditions. EcoBrush - Value, versatility and performance in one compact unit.

Top: Adjustable working angle with a single lever.
Bottom: Centrally driven brush to allow brushing to the edge of either side

Single lever directional angle adjustment to either side with five positions

Infinately adjustable, one handed brush pressure control

Robust galvanised steel construction with three coats of rubberised paint

Large number of quick fit accessories for versatility

Centrally driven brushes to allow for brushing right to the edge

Model	Working width, coverage	Engine and power	Wheel-drive, speed	Weight packaging measurements (W/L/H cm)	Accessories
AS 730 EcoBrush	70 cm, 2,100 m ² /h	B+S 60 Ready Start, 2.8 kW (3.8 HP) at 3050 rpm	Rear-wheel drive, 1 gear (3.2 km/h)	60 kg 70 x 107 x 65	Collection box, dust cover, large capacity leaf blade, universal brush, snow plow, snow chains, ag tyres
AS 830 EcoBrush	80 cm, 3,000 m ² /h	B+S 60 Ready Start, 2.8 kW (3.8 HP) at 3050 rpm	Rear-wheel drive, 1 gear (3.7 km/h)	65 kg 75 x 120 x 70	Collection box, dust cover, large capacity leaf blade, universal brush, snow plow, snow chains
AS 835 EcoBrush	80 cm, 3,000 m ² /h	B+S 60 Ready Start, 2.8 kW (3.8 HP) at 3050 rpm	Rear-wheel drive, 1 gear (3.7 km/h)	81 kg 75 x 120 x 70	Collection box, dust cover, large capacity leaf blade, universal dual compound brush, snow plow, snow chains, Polar Trec wheels

PRO ProBrush sweepers - Step up a gear or two

As the name suggest the ProBrush sweepers are designed for regular use and are packed with features for commercial use. A broader sweeping width and larger diameter brush ensure outstanding performance in dirt, leaves and snow. Special snow brushes and chains are available for winter maintenance.

The centrally driven brush allows for use against walls and edges on either side of the machine and with the smart dual compound brush makes this a great all-rounder. Fine black bristles deal with dust and smaller particles from cracks and crevices and the coarse orange ones break away even the most stubborn dirt.

For optimum performance both the brush speed and forward motion are adjustable to ensure you get just the right balance. Large pneumatic tires give great traction even on unstable terrain.

Dual compound brush: for dust and hard dirt

Highly-elastic acrylic deflector with steel re-enforcement: resilient to temperature and indestructible

Centrally driven brushes allow for brushing right to the edge

Model	Working width, coverage	Type of motor, output	Wheel-drive, speed	Weight packaging measurements (W/L/H cm)	Accessories
AS 835 ProBrush	80 cm, 3,500 m ² /h	B+S 60 Ready Start, 2.8 kW (3.8 HP) at 3050 rpm	3 forward and 1 reverse gear, 4.2 km/h	93 kg 75 x 120 x 70 cm	Collection box, protection cover, leaf collector, universal dual compound brush, snow brush, plough, snow chains, Polar Trec wheels
AS 1040 ProBrush	100 cm, 4,200 m ² /h	B+S 60 Ready Start, 2.8 kW (3.8 HP) at 3050 rpm	3 forward and 1 reverse gear, 4.2 km/h	108 kg 79 x 120 x 84 cm	Collection box, protection cover, leaf collector, universal dual compound brush, snow brush, plough, snow chains, Polar Trec wheels

Top: Always the right gear - gear lever on the AS 1040.

Bottom: Pneumatic tyre for stable ground contact on uneven surfaces.

Single lever brush speed control

Solid ergonomic handles with a reverse for optimum maneuverability
